INDEX TO VOLUME VII

Aerobic spore-bearing bacteria, Influence of vacuum upon growth of some.. 283
—— thermophilic bacteria from water. Studies on thermophilic bacteria, I, 343
Agar slants, The use of, in detecting ammonia production and its relation to the reduction of nitrates..... 515
Agglutination, spontaneous, A study of, in the colon-typhoid group of bacilli..... 71
——, Studies upon, in the colon-typhoid group of bacilli..... 39
Albus, W. R., Sherman, J. M. and Holm, G. E. Salt effects in bacterial growth. III. Salt effects in relation to the lag period and velocity of growth..... 583
American gentian violets, An investigation of. Report of committee on bacteriological technic..... 529
—— stains, An investigation of. Report of committee on bacteriological technic..... 127
Ammonia production and its relation to the reduction of nitrates, The use of agar slants in detecting..... 515
Anaerobe, saprophytic, Quantitative determination of some of the biochemical changes produced by a..... 373
Anaerobes, A method for the cultivation of..... 277
——, pathogenic, Studies in, V. Certain genera of the clostridiaceae..... 1
Apparatus, An, for the rapid measurement of surface tension..... 367
Autolysis, Bacterial..... 551
Ayers, S. Henry and Mudge, Courtland S. The relation of vitamines to the growth of a streptococcus..... 449

B. putrificus Bienstock, *Clostridium putrificum*, a distinct species..... 505
Bacilli, A study of spontaneous agglutination in the colon-typhoid group of 71
Bacilli, Studies upon agglutination in the colon-typhoid group of..... 39
Bacillus hemoglobinophilus canis (Friedberger) (*Hemophilus canis emend*).. 579
Bact. coli, The effects of temperature and hydrogen ion concentration upon the viability of, and *Bact. typhosum* in water. Disinfection studies..... 183
——, The growth of, in relation to H-ion concentration. Salt effects in bacterial growth, II..... 465
Bact. typhosum in water. The effects of temperature and hydrogen ion concentration upon the viability of *Bact. coli* and. Disinfection studies 183
Bacteria, A binocular microscope arranged for the study of colonies of..... 121
——, Influence of vacuum upon growth of some spore-bearing..... 283
——, Lactic acid, Studies on the biology of, a summary of personal investigations..... 271
——, Method for the isolation of, in pure culture from single cells and procedure for the direct tracing of bacterial growth on a solid medium.... 537

Bacteria, A method of detecting rennet production by..... 447
—— oxidizing sulfur under acid and alkaline conditions. Microörganisms concerned in the oxidation of sulfur in the soil, V..... 609
——, The proportion of viable, in young cultures with especial reference to the technique employed in counting..... 405
——, The sources and characteristics of the, in decomposing salmon..... 85
——, Studies on cultural requirements of, I..... 309
——, Studies on cultural requirements of, II..... 325
—— symbiotic in the tissues of higher organisms, A note on the morphology of..... 471
——, thermophilic, Studies on, I. Aerobic thermophilic bacteria from water. 343
Bacterial autolysis..... 551
—— growth on a solid medium, procedure for the direct tracing of, Method for the isolation of bacteria in pure culture from single cells and..... 537
—— ——, Salt effects in, II. The growth of *Bact. coli* in relation to H-ion concentration..... 465
—— ——, —— —— ——, III. Salt effects in relation to the lag period and velocity of growth..... 583
Bacteriological medium, Transparent milk as a..... 511
Bacteriolysants, Observations on the nature of (D'Herelle's phenomenon, bacteriophage, bacteriolytic agent, etc.)..... 491
——, Observations on the properties of (D'Herelle's phenomenon, bacteriophage, bacteriolytic agent, etc.)..... 475
Bacteriolytic agent, etc. D'Herelle's phenomenon, bacteriophage, observations on the nature of bacteriolysants..... 491
Bacteriophage, bacteriolytic agent, etc., D'Herelle's phenomenon, Observations on the nature of bacteriolysants..... 491
Baker, H. R. Substitution of brom-thymol-blue for litmus in routine laboratory work..... 301
Beverages, carbonated, Viability of the colon-typhoid group in carbonated water and..... 111
Binocular, A, microscope arranged for the study of colonies of bacteria.... 121
Biochemical changes produced by a saprophytic anaerobe. Quantitative determination of some of the..... 373
Biology, Studiés on the, of lactic acid bacteria: a summary of personal investigations..... 271
Breed method, The use of domestic methylene blue in staining milk by the.. 307
Brom-thymol-blue, Substitution of, for litmus in routine laboratory work.. 301
Brown, J. Howard and Howe, Paul E. Transparent milk as a bacteriological medium..... 511
Burke, Victor. Notes on the Gram stain with description of a new method.. 159
Bushnell, L. D. Influence of vacuum upon growth of some aerobic spore-bearing bacteria..... 283
Bushnell, L. D. A method for the cultivation of anaerobes..... 277
—— Quantitative determination of some of the biochemical changes produced by a saprophytic anaerobe..... 373

Candies, chocolate, The cause of explosion in..... 599
Carbonated water and carbonated beverages, Viability of the colon-typhoid group in..... 111
Cause, The, of explosion in chocolate candies..... 599
Certain genera of the clostridiaceae. Studies in pathogenic anaerobes, V.. 1
Chocolate candies, The cause of explosion in..... 599
Clostridiaceae, Certain genera of the. Studies in pathogenic anaerobes, V.. 1
Clostridium putrificum (*B. putrificus* Bienstock), a distinct species..... 505
Cohen, Barnett. Disinfection studies. The effects of temperature and hydrogen ion concentration upon the viability of *Bact. coli* and *Bact. typhosum* in water..... 183
Colon-typhoid group in carbonated water and carbonated beverages, Viability of the..... 111
Colon-typhoid group of bacilli, A study of spontaneous agglutination in the. 71
Colon-typhoid group of bacilli, Studies upon agglutination in the..... 39
Colonies of bacteria, A binocular microscope arranged for the study of.... 121
"Color standards" for the colorimetric determination of H-ion concentration, Further observations on..... 589
Colorimetric determination of H-ion concentration, Further observations on "color standards" for the..... 589
Committee on bacteriological technic, Report of. An investigation of American gentian violets..... 529
—— on bacteriological technic, Report of. An investigation of American stains..... 127
—— on bacteriological technic, Report of. Methods of pure culture study. 519
Conn, H. J., Chairman. An investigation of American gentian violets. Report of committee on bacteriological technic..... 529
—— —— An investigation of American stains. Report of the committee on bacteriological technic..... 127
—— —— Methods of pure culture study. Report of committee on bacteriological technic..... 519
Conn, H. J. A method of detecting rennet production by bacteria..... 447
Counting the number of fungi in the soil, A method for..... 339
——, The proportion of viable bacteria in young cultures with especial reference to the technique employed in..... 405
Cultivation of anaerobes, A method for the..... 277
—— of *Thiobacillus thiooxidans*, a solid medium for the isolation and. Microorganisms concerned in the oxidation of sulfur in the soil, IV..... 605
Cultural requirements of bacteria, Studies on, I..... 309
—— —— —— ——, Studies on, II..... 325
Culture study, Methods of pure. Report of committee on bacteriological technic..... 519

Davison, Wilburt C. Observations on the nature of bacteriolysants (D'Herelle's phenomenon, bacteriophage, bacteriolytic agent, etc.) 491
—— Observations on the properties of bacteriolysants (D'Herelle's phenomenon, bacteriophage, bacteriolytic agent, etc.)..... 475
D'Herelle's phenomenon, bacteriophage, bacteriolytic agent, etc., Observations on the nature of bacteriolysants..... 491

Disinfection studies. The effects of temperature and hydrogen ion concentration upon the viability of *Bact. coli* and *Bact. typhosum* in water.... 183

Explosion, the cause of, in chocolate candies..... 599

Fred, E. B. and Peterson, W. H. The production of pink sauerkraut by yeasts..... 257
Fungi in the soil, A method for counting the number of..... 339
Further observations on "color standards" for the colorimetric determination of H-ion concentration..... 589

Genera, Certain, of the clostridiaceae. Studies in pathogenic anaerobes, V. 1
Gentian violets, An investigation of American. Report of committee on bacteriological technic..... 529
Gorini, Costantino. Studies on the biology of lactic acid bacteria: a summary of personal investigations..... 271
Gram stain, Notes on the, with description of a new method..... 159
Green, Robert G. An apparatus for the rapid measurement of surface tension..... 367
Growth, bacterial, on a solid medium, procedure for the direct tracing of, Method for the isolation of bacteria in pure culture from single cells and 537
——, ——, Salt effects in, III. Salt effects in relation to the lag period and velocity of growth..... 583
—— of a streptococcus, The relation of vitamines to the..... 449
—— of some aerobic spore-bearing bacteria, Influence of vacuum upon.... 283
——, Salt effects in relation to the lag period and velocity of. Salt effects in bacterial growth, III..... 583
——, The, of *Bact. coli* in relation to H-ion concentration. Salt effects in bacterial growth, II..... 465

H-ion concentration, Further observations on "color standards" for the colorimetric determination of..... 589
—— ——, The growth of *Bact. coli* in relation to. Salt effects in bacterial growth, II..... 465
Harrison, F. C. Our society..... 149
Heller, Hilda Hempl. Certain genera of the clostridiaceae. Studies in pathogenic anaerobes, V..... 1
Hemoglobinophilus canis, Bacillus (Friedberger) (*Hemophilus canis emend*).. 579
Hemophilus canis emend, Bacillus hemoglobinophilus canis (Friedberger)... 579
Holm, George E. and Sherman, James M. Salt effects in bacterial growth. II. The growth of *Bact. coli* in relation to H-ion concentration..... 465
——, ——, and Albus, W. R. Salt effects in bacterial growth. III. Salt effects in relation to the lag period and velocity of growth..... 583
Howe, Paul E. and Brown, J. Howard. Transparent milk as a bacteriological medium..... 511
Hucker, G. J. and Wall, W. A. The use of agar slants in detecting ammonia production and its relation to the reduction of nitrates..... 515
Hunter, Albert C. The sources and characteristics of the bacteria in decomposing salmon..... 85
Hydrogen ion concentration, The effects of temperature and, upon the viability of *Bact. coli* and *Bact. typhosum* in water. Disinfection studies.. 183

Influence of vacuum upon growth of some anaerobic spore-bearing bacteria.. 283
Investigation, An, of American gentian violets. Report of committee on bacteriological technic..... 529
——, ——, of American stains. Report of committee on bacteriological technic..... 127
Ishii, O. A study of spontaneous agglutination in the colon-typhoid group of bacilli..... 71
—— Studies upon agglutination in the colon-typhoid group of bacilli..... 39
Isolation and cultivation of *Thiobacillus thiooxidans*, A solid medium for the. Microörganisms concerned in the oxidation of sulfur in the soil, IV.... 605
—— of bacteria in pure culture from single cells, Method for the, and procedure for the direct tracing of bacterial growth on a solid medium..... 537

Joffe, J. S. and Waksman, Selman A. Microörganisms concerned in the oxidation of sulfur in the soil. II. *Thiobacillus thiooxidans*, a new sulfur-oxidizing organism isolated from the soil..... 239

Koser, S. A. and Skinner, W. W. Viability of the colon-typhoid group in carbonated water and carbonated beverages..... 111

Lactic acid bacteria: Studies on the biology of, a summary of personal investigations..... 271
Lag period, Salt effects in relation to the, and velocity of growth. Salt effects in bacterial growth, III..... 583
Litmus, Substitution of brom-thymol-blue for, in routine laboratory work.. 301

Medalia, L. S. Further observations on "color standards" for the colorimetric determination of H-ion concentration..... 589
Medium, bacteriological, Transparent milk as a..... 511
——, procedure for the direct tracing of bacterial growth on a solid, Method for the isolation of bacteria in pure culture from single cells and..... 537
——, A solid, for the isolation and cultivation of *Thiobacillus thiooxidans*. Microörganisms concerned in the oxidation of sulfur in the soil, IV.... 605
Method, A, for counting the number of fungi in the soil..... 339
——, A, for the cultivation of anaerobes..... 277
—— for the isolation of bacteria in pure culture from single cells and procedure for the direct tracing of bacterial growth on a solid medium..... 537
Method, A, of detecting rennet production by bacteria..... 447
Methods of pure culture study. Report of committee on bacteriological technic..... 519
Methylene blue, The use of domestic, in staining milk by the Breed method.. 307
Microörganisms concerned in the oxidation of sulfur in the soil. I. Introductory..... 231
—— —— —— —— —— —— —— —— —— ——. II. *Thiobacillus thiooxidans*, a new sulfur-oxidizing organism isolated from the soil..... 239
—— —— —— —— —— —— —— —— —— ——. IV. A solid medium for the isolation and cultivation of *Thiobacillus thiooxidans*..... 605
—— —— —— —— —— —— —— —— —— ——. V. Bacteria oxidizing sulfur under acid and alkaline conditions..... 609

Microscope, A binocular, arranged for the study of colonies of bacteria.... 121
Milk, Transparent, as a bacteriological medium..... 511
——, The use of domestic methylene blue in staining, by the Breed method.. 307
Morphology, A note on the, of bacteria symbiotic in the tissues of higher organisms..... 471
Morrison, Lethe E. and Tanner, Fred W. Studies on thermophilic bacteria. I. Aerobic thermophilic bacteria from water..... 343
Mudge, Courtland S. and Ayers, S. Henry. The relation of vitamines to the growth of a streptococcus..... 449
Mueller, J. Howard. Studies on cultural requirements of bacteria, I..... 309
—— Studies on cultural requirements of bacteria, II..... 325

Nature of bacteriolysants (D'Herelle's phenomenon, bacteriophage, bacteriolytic agent, etc.)..... 491
Nitrates, The use of agar slants in detecting ammonia production and its relation to the reduction of..... 515
Note, A, on the morphology of bacteria symbiotic in the tissues of higher organisms..... 471
Notes on the Gram stain with description of a new method..... 159

Observations on the nature of bacteriolysants (D'Herelle's phenomenon, bacteriophage, bacteriolytic agent, etc.)..... 491
—— on the properties of bacteriolysants (D'Herelle's phenomenon, bacteriophage, bacteriolytic agent, etc.)..... 475
Ørskov, J. Method for the isolation of bacteria in pure culture from single cells and procedure for the direct tracing of bacterial growth on a solid medium..... 537
Our society..... 149
Oxidation of sulfur in the soil. Microörganisms concerned in the. I. Introductory..... 231
—— —— —— —— —— ——. —— —— —— ——. II. *Thiobacillus thiooxidans*, a new sulfur-oxidizing organism isolated from the soil..... 239
—— —— —— —— —— ——. —— —— —— ——. IV. A solid medium for the isolation and cultivation of *Thiobacillus thiooxidans*..... 605
—— —— —— —— —— ——. —— —— —— ——. V. Bacteria oxidizing sulfur under acid and alkaline conditions..... 609

Pathogenic anaerobes, Studies in, V. Certain genera of the clostridiaceae.. 1
Peterson, W. H. and Fred, E. B. The production of pink sauerkraut by yeasts..... 257
Pink sauerkraut, The production of, by yeasts..... 257
Production, The, of pink sauerkraut by yeasts..... 257
Properties of bacteriolysants, Observations on the (D'Herelle's phenomenon, bacteriophage, bacteriolytic agent, etc.)..... 475
Proportion, The, of viable bacteria in young cultures with especial reference to the technique employed in counting..... 405
Pure culture from single cells, Method for the isolation of bacteria in, and procedure for the direct tracing of bacterial growth on a solid medium. 537
—— —— study, Methods of. Report of committee on bacteriological technic 519

Quantitative determination of some of the biochemical changes produced by a saprophytic anaerobe..... 373

Rapid measurement of surface tension, An apparatus for the..... 367
Reddish, George F. and Rettger, Leo F. *Clostridium putrificum* (*B. putrificus* Bienstock), a distinct species..... 505
Reduction of nitrates, The use of agar slants in detecting ammonia production and its relation to the..... 515
Reed, Guilford B. A binocular microscope arranged for the study of colonies of bacteria..... 121
Relation, The, of vitamines to the growth of a streptococcus..... 449
Rennet production, A method of detecting, by bacteria..... 447
Report of committee on bacteriological technic. An investigation of American gentian violets..... 529
—— —— —— —— —— ——. An investigation of American stains..... 127
—— —— —— —— —— ——. Method of pure culture study..... 519
Rettger, Leo F. and Reddish, George F. *Clostridium putrificum* (*B. putrificus* Bienstock), a distinct species..... 505
—— and Sturges, William S. Bacterial autolysis..... 551
Rivers, T. M. *Bacillus hemoglobinophilus canis* (Friedberger) (*Hemophilus canis emend*)..... 579
Robertson, A. H. and Wall, W. A. The use of domestic methylene blue in staining milk by the Breed method..... 307

Salmon, The sources and characteristics of the bacteria in decomposing..... 85
Salt effects in bacterial growth. II. The growth of *Bact. coli* in relation to H-ion concentration..... 465
—— —— —— —— ——. III. Salt effects in relation to the lag period and velocity of growth..... 583
Salt effects in relation to the lag period and velocity of growth. Salt effects in bacterial growth, III..... 583
Saprophytic anaerobe, Quantitative determination of some of the biochemical changes produced by a..... 373
Sauerkraut, pink, The production of, by yeasts..... 257
Sherman, James M. and Holm, George E. Salt effects in bacterial growth. II. The growth of *Bact. coli* in relation to H-ion concentration..... 465
Sherman, J. M., Holm, G. E. and Albus, W. R. Salt effects in bacterial growth. III. Salt effects in relation to the lag period and velocity of growth..... 583
Single cells, Method for the isolation of bacteria in pure culture from, and procedure for the direct tracing of bacterial growth on a solid medium.. 537
Skinner, W. W. and Koser, S. A. Viability of the colon-typhoid group in carbonated water and carbonated beverages..... 111
Society, Our..... 149
Soil, A method for counting the number of fungi in the..... 339
——, sulfur in the, Microörganisms concerned in the oxidation of. I. Introductory..... 231
——, —— —— ——, —— —— —— —— —— ——. II. *Thiobacillus thiooxidans*, a new sulfur-oxidizing organism isolated from the soil..... 239

Soil, Microörganisms concerned in the oxidation of sulfur in the. IV. A solid medium for the isolation and cultivation of *Thiobacillus thiooxidans* 605
——, —— —— —— —— —— —— —— ——. V. Bacteria oxidizing sulfur under acid and alkaline conditions..... 609
Sources, The, and characteristics of the bacteria in decomposing salmon... 85
Species, A distinct, *Clostridium putrificum* (*B. putrificus* Bienstock)..... 505
Spore-bearing bacteria, Influence of vacuum upon growth of some aerobic.. 283
Stain, Gram, Notes on the, with description of a new method..... 159
Staining milk by the Breed method, The use of domestic methylene blue in. 307
Stains, American. An investigation of. Report of committee on bacteriological technic..... 127
Streptococcus, The relation of vitamines to the growth of a..... 449
Studies in pathogenic anaerobes. V. Certain genera of the clostridiaceae.. 1
—— on cultural requirements of bacteria. I..... 309
—— —— —— —— —— ——. II..... 325
—— on the biology of lactic acid bacteria: a summary of personal investigations..... 271
—— on thermophilic bacteria I. Aerobic thermophilic bacteria from water. 343
—— upon agglutination in the colon-typhoid group of bacilli..... 39
Study, A, of spontaneous agglutination in the colon-typhoid group of bacilli. 71
Sturges, William S. and Rettger, Leo F. Bacterial autolysis..... 551
Substitution of brom-thymol-blue for litmus in routine laboratory work... 301
Sulfur in the soil. Microörganisms concerned in the oxidation of. I. Introductory..... 231
Sulfur in the soil, Microörganisms concerned in the oxidation of. II. *Thiobacillus thiooxidans*, a new sulfur-oxidizing organism isolated from the soil..... 239
—— —— —— ——, —— —— —— —— —— ——. IV. A solid medium for the isolation and cultivation of *Thiobacillus thiooxidans*..... 605
—— —— —— ——, —— —— —— —— —— ——. V. Bacteria oxidizing sulfur under acid and alkaline conditions..... 609
Sulfur-oxidizing organism isolated from the soil, *Thiobacillus thiooxidans*, a new. Microörganisms concerned in the oxidation of sulfur in the soil, II..... 239
Sulfur under acid and alkaline conditions, Bacteria oxidizing. Microorganisms concerned in the oxidation of sulfur in the soil, V..... 609
Surface tension, An apparatus for the rapid measurement of..... 367

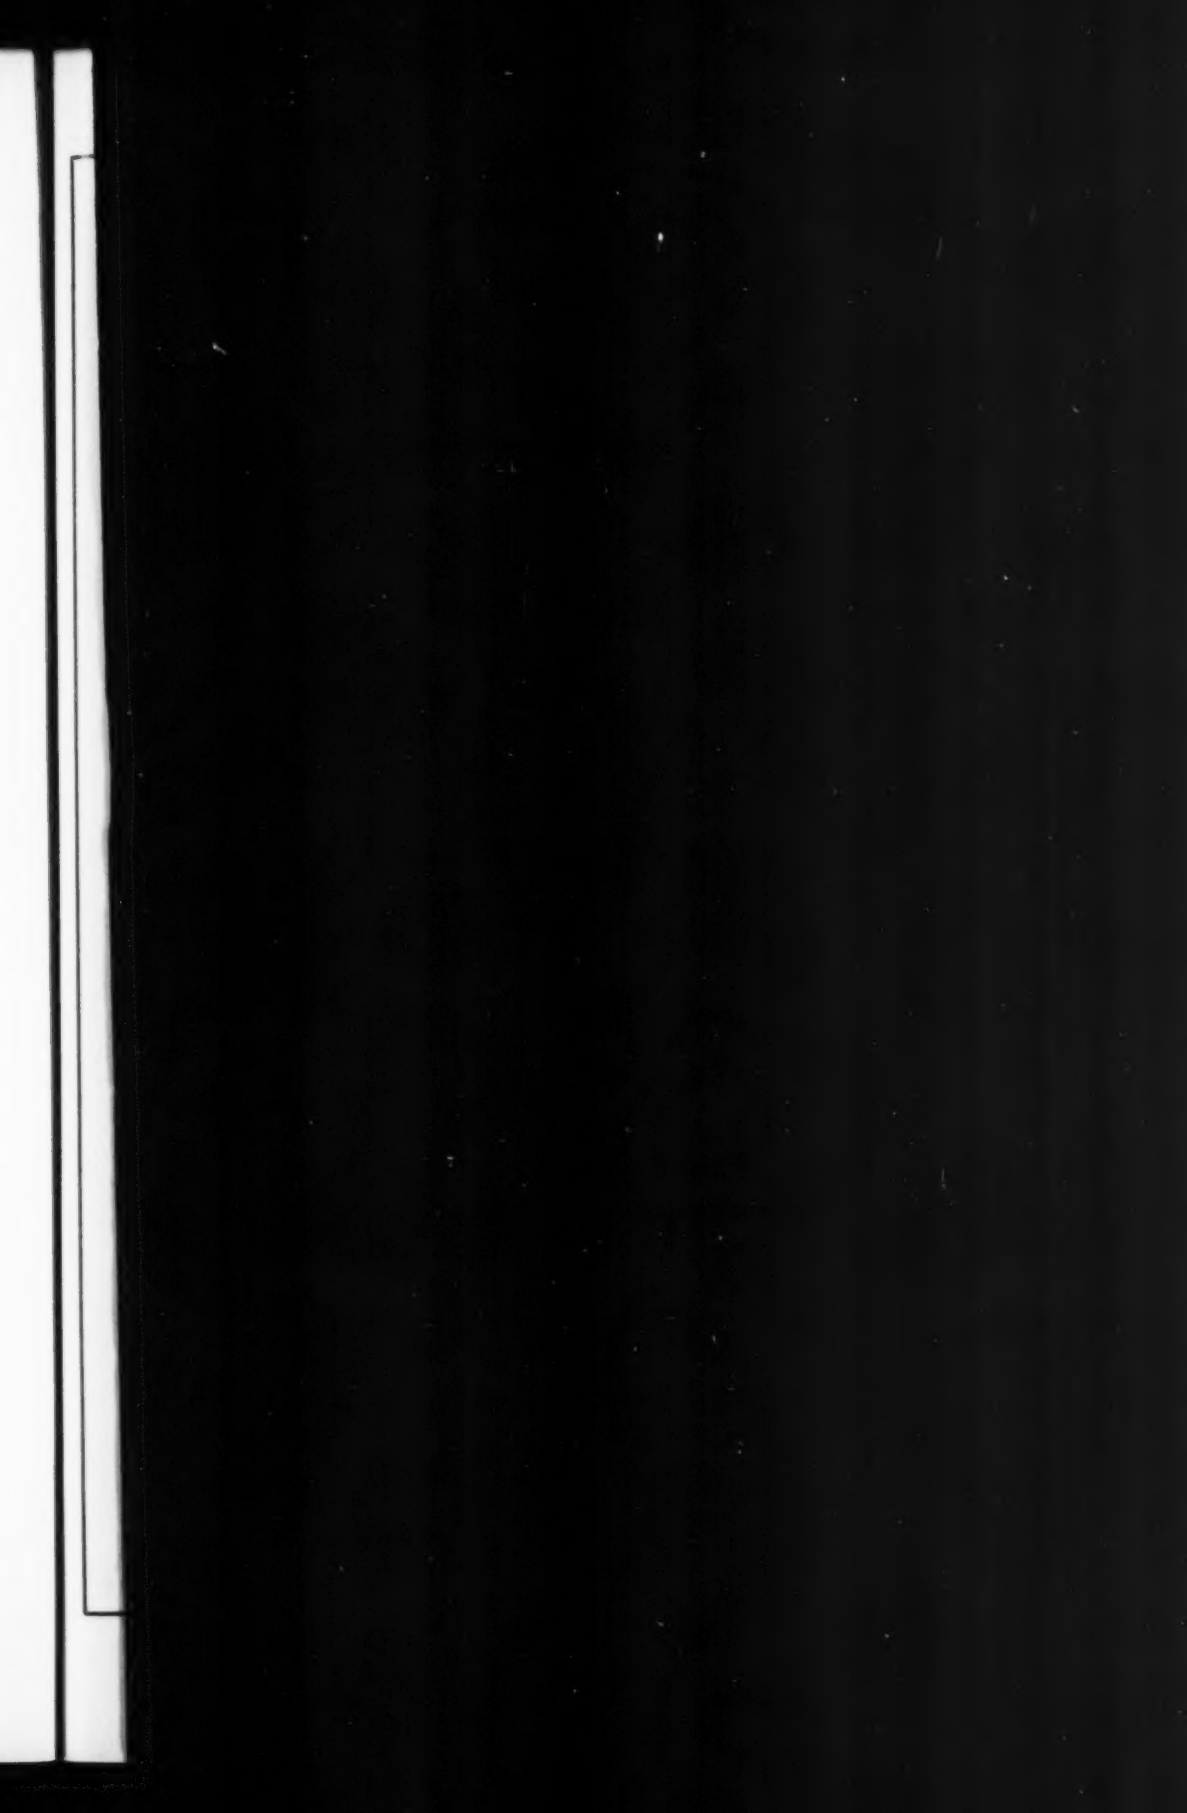
Tanner, Fred W. and Morrison, Lethe E. Studies on thermophilic bacteria. I. Aerobic thermophilic bacteria from water..... 343
Technic, bacteriological. Report of committee on. An investigation of American gentian violets..... 529
——, ——, —— —— —— ——. An investigation of American stains..... 127
——, ——, —— —— —— ——. Methods of pure culture study..... 519
Technique employed in counting, The proportion of viable bacteria in young cultures with especial reference to the..... 405
Temperature and hydrogen ion concentration. The effects of, upon the viability of *Bact. coli* and *Bact. typhosum* in water. Disinfection studies. 183

Thermophilic bacteria, Studies on, I. Aerobic thermophilic bacteria from water..... 343
Thiobacillus thiooxidans, a new sulfur-oxidizing organism isolated from the soil. Microörganisms concerned in the oxidation of sulfur in the soil, II. 239
—— ——, A solid medium for the isolation and cultivation of. Microörganisms concerned in the oxidation of sulfur in the soil, IV..... 605
Transparent milk as a bacteriological medium..... 511

Use, The, of agar slants in detecting ammonia production and its relation to the reduction of nitrates..... 515
——, The, of domestic methylene blue in staining milk by the Breed method.. 307

Vacuum, Influence of, upon growth of some anaerobic spore-bearing bacteria. 283
Velocity of growth, Salt effects in relation to the lag period and, Salt effects in bacterial growth, III..... 583
Viability of *Bact. coli* and *Bact. typhosum* in water, The effects of temperature and hydrogen ion concentration upon the. Disinfection studies.. 183
—— of the colon-typhoid group in carbonated water and carbonated beverages..... 111
Viable bacteria, The proportion of, in young cultures with especial reference to the technique employed in counting..... 405
Vitamines, The relation of, to the growth of a streptococcus..... 449

Waksman, Selman A. A method for counting the number of fungi in the soil..... 339
——. Microörganisms concerned in the oxidation of sulfur in the soil. I. Introductory..... 231
——. —— —— —— —— —— —— —— —— —— ——. IV. A solid medium for the isolation and cultivation of *Thiobacillus thiooxidans*..... 605
——. —— —— —— —— —— —— —— —— —— ——. V. Bacteria oxidizing sulfur under acid and alkaline conditions..... 609
—— and Joffe, J, S. Microörganisms concerned in the oxidation of sulfur in the soil. II. *Thiobacillus thiooxidans*, a new sulfur-oxidizing organism isolated from the soil..... 239
Wall, W. A. and Hucker, G. J. The use of agar slants in detecting ammonia production and its relation to the reduction of nitrates..... 515
—— and Robertson, A. H. The use of domestic methylene blue in staining milk by the Breed method..... 307
Wallin, Ivan E. A note on the morphology of bacteria symbiotic in the tissues of higher organisms..... 471
Water, Aerobic thermophilic bacteria from. Studies on thermophilic bacteria, I..... 343
——, carbonated, and carbonated beverages, Viability of the colon-typhoid group in..... 111
——, The effects of temperature and hydrogen ion concentration upon the viability of *Bact. coli* and *Bact. typhosum* in. Disinfection studies..... 183
Weinzirl, John. The cause of explosion in chocolate candies..... 599

Wilson, G. S. The proportion of viable bacteria in young cultures with especial reference to the technique employed in counting..... 405


Yeasts, The production of pink sauerkraut by..... 257
Young cultures, The proportion of viable bacteria in, with especial reference to the technique employed in counting..... 405
